LOC Annual Redetermination Process Change

The current Level of Care (LOC) process measures compliance for LOC redeterminations being completed timely when they are conducted within 365 calendar days of the last LOC. TCM agencies requested that the Division review the current process for LOC redeterminations to meet annual requirements.

In response to the request, annual redetermination has been redefined in order to make this easier for Support Coordinators (SCs) to meet the annual LOC redetermination requirement. Enhancements to the process will link the annual LOC implementation date to the annual Individual Support Plan (ISP) implementation date.

Effective April 1, 2018 LOCs will be completed within 90 days prior to the ISP implementation date, thus making the LOC implementation date effective with the ISP implementation date.

A webinar providing additional details will be hosted by the Division on April 19, 2018 at 10:30 a.m. and 1:30 p.m. To register for one of these sessions (both sessions will provide the same information), please visit:
