Benefits of Using StationMD's Free Telemedicine Service

During the COVID-19 crisis, it is still important to keep up with regular doctors' appointments and address medical concerns. When possible, this should be done from the comfort and safety of home to minimize risk for support staff, caregivers, and the individual. **This is where StationMD can help you.** StationMD doctors help fill gaps in care – prescribing and refilling medications, answering medical questions, and performing virtual assessments. As a reminder, StationMD is **free** for Missouri's Medicaid Waiver recipients. To learn more about the service, [visit our website](#) or contact MO-DMH@StationMD.com.

Also, the Division hosted a Facebook LIVE information session regarding StationMD on Monday, August 31. Participants were able to tune into the live event to learn how to take advantage of StationMD services and when to call StationMD. Please click [here](#) to access the event recording to learn more.
