## COVID-19 Vaccination Information

Missourians in Phase 1A and Phase 1B Tiers 1 and 2 can access vaccinations through a variety of settings including their employer, health care providers, and mass vaccination events. Missouri's latest press release with vaccine information can be found [here](#). Information about a number of vaccine events that will be occurring during the month of February can be found [here](#). To obtain additional information for these vaccine events, visit the websites for facilities listed, watch your local news, talk with your medical provider, and/or visit the website of your local public health agency to get registered for these events. In addition, you can visit <https://covidvaccine.mo.gov/events/> to register for some events as they become available. **PLEASE NOTE: Events will fill quickly and some may already be filled due to sign ups through local channels such as local public health agencies and health care providers.**

For the month of February, Missouri will be directing just over half of Missouri's distribution of vaccine to selected hospitals across Missouri. These facilities will be able to vaccinate individuals in the activated [Phases](#). Specific hospitals that will be hosting vaccine clinics are listed [here](#).

In addition to these efforts, there will be Missouri National Guard supported events throughout Missouri. These events will continue on a rotating basis through the regions with additional locations added for subsequent weeks. Continue to watch for vaccine information from your local news, officials, and healthcare providers and check <https://covidvaccine.mo.gov/events/>. Events will continue to be scheduled each week throughout the state.
