

Improving lives THROUGH
supports and services
THAT FOSTER self-determination.

11/29/21

Supporting Families Summit

Wednesday, December 1, 2021 1:00 - 3:00

The 10-year anniversary of the National Agenda for Supporting Families with a Member with Intellectual and Developmental Disabilities (developed at the [Wingspread Conference](#)) provides an opportunity to celebrate a decade of learning and discuss today's context and the current reality of supporting families in several key priority areas, such as:

- Enhancements to state service system structures;
- Initiatives exploring and identifying promising family support principles and practices to inform policies;
- Efforts for national data collection; and
- Key policy development to better assist families.

Join as the [Community of Practice for Supporting Families](#) partners, in collaboration with the Administration for Community Living, reflect on progress made and aspirations for the future. All are welcome, but registration is required.
