Department of Health and Senior Services **State Plan on Aging Survey**

The Department of Health and Senior Services, Division of Senior and Disability Services (DSDS) is currently in the process of writing the next Missouri State Plan on Aging. An important part of developing the State Plan on Aging is getting input from older adults, adults with disabilities, aging network partners, stakeholders and concerned citizens in regard to the priorities the state should focus on in the State Plan on Aging. DSDS is seeking input through a short survey. Two surveys are available, one for Older Adults and Adults with Disabilities and one for Aging Network Partners and Stakeholders. The surveys can be found at <https://health.mo.gov/seniors/state-plan-aging.php>. A list of the possible priorities and their definitions can also be located on the site.
