### Accessible Voting Equipment Tutorials are Now Available

The Missouri Developmental Disabilities Council (MODDC) funded a project to connect voters and election workers in Missouri with quick, overview videos on how to use the accessible voting equipment in their county. These videos are designed to:

- Prepare voters on what to expect when they go vote,
- Provide additional support to election judges on how to operate the machines, and
- Serve as a way to troubleshoot any issues encountered by election judges or voters the day of voting.
