## National Disability Employment Awareness Month

### Opening the Door: Importance of Person-Centered Conversations on Employment

October 19, 2022  
2:00 - 3:00

Facilitating guided, person-centered conversations around employment can help people who use Long-Term Services and Supports (LTSS) make their own informed decisions about work. Such conversations help people and their circles of support discover employment possibilities and understand the options that exist.

In recognition of National Disability Employment Awareness Month (NDEAM), this webinar, co-hosted by the National Center on Advancing Person-Centered Practices and Systems (NCAPPS) and the State Employment Leadership Network (SELN), will highlight successful person-centered approaches and tools for discussing employment.
