### **Kids Assistive Technology (KAT)**

Kids Assistive Technology (KAT) can help families with funding assistance when needed for purchase of assistive technology for children ages birth through 20. KAT can help with the costs of home access modifications such as a stairway lift or a ramp.

The program can also help with vehicle access such as wheelchair lifts, and with items such as Braille/low-vision devices, augmentative communication devices, mobility aids, and other assistive technology devices.

Visit [Missouri Assistive Technology website](#) for more information.
