### **Solar Eclipse Safety In Plain Language**

On April 8, 2024, there will be a solar eclipse taking place and many people are planning to watch. Looking at the sun during an eclipse is dangerous. If you plan to watch the eclipse, you need to understand what is happening and plan for your safety by knowing what you can and cannot do.

Green Mountain Self-Advocates created [Solar Eclipse Safety in Plain Language](#) slides that help explain the eclipse and how to watch is safely.
