Northwest and East Missouri Autism Project Program Update

The Northwest and East Missouri Autism Project Regional Parent Advisory Councils (PACs) have recommended updates to the current program model. Historically, there has been a waitlist for access to program funding in these two regions. At the same time, administrative complexities related to the current program model have resulted in the funds not being fully expended each year.

The updated model, Family Flexible Assistance Program (FFAP), will streamline operations to provide easier access to services and supports to more individuals with autism and their families. The FFAP will also provide families and individuals choice and flexibility in accessing resources, supports, and services.

The FFAP will begin in January 2025.
