2025 Tier 3 Intensive Supports Workshop

Virtual Learning Opportunity:  
Workshop: Trauma-Responsive ABA: Building Healthy  
Pathways to Behavior Change

February 24, 2025  
12:00 p.m. to 2:00 p.m.

Historically, Applied Behavior Analysis (ABA) services have focused on behavior change through evidence-based practices, but incorporating a trauma-responsive framework into service delivery is now becoming standardized in our approach to treatment. This is even more true for individuals who have a history of trauma. This presentation is designed to help behavior analysts gain a deeper understanding of trauma responsiveness and its integration into ABA services.

**Objectives:**

- Participants will explore key concepts in trauma-informed care
- Participants will be able to identify how to embed trauma-responsive practices into assessment, intervention, and behavior support planning
- Participants will explore ways to reduce risk of re-traumatization while creating supportive environments

**Presenter:**

- Danyelle S. Goatee Beal, Psy.D., BCBA

**Target Audience:**

- Behavioral Service Providers
- Other interested stakeholders
